

FlameReader.com

Taken from flamereader.com

FlameReader is a multi-function Text to Speech software with natural, human-sounding voice. This powerful software reads aloud any text from Word, Emails, web Pages, Power Points, PDF and more; converts any text into audio files to play on portable devices like CD player and Ipod. FlameReader also provides special version for users fighting against reading and writing due to dyslexia, visual problems or other conditions. Students, commercial people, language learners, writers and more—from children to seniors, from study to work, find FlameReader is an important and necessary tool in daily life.

DYSLEXIA:

Tool for practicing and improvement

Do you hear of the three steps for teaching reading for dyslexia?

How can dyslexia practice by themselves?

You want to find a training tool for your dyslexic child?

Ronald D. Davis proposed three techniques to help dyslexic students master the mechanics of reading, and increase reading speed and comprehension: Spell-Reading, Sweep-Sweep-Spell, and Picture-at-Punctuation. It helped lots of dyslexic people in past years. [You can learn more about it clicking here.](#)

These need practice, not only in the special courses, but also at home. All the parents are willing to help with their children, but they can't leave their work in certain conditions. In this case, FlameReader's Special-Need version can help you. Children can practice by themselves with FlameReader.

Dyslexia can use "mouse echo" function to practice in "Spell-Reading" step. Mouse echo can read what you are pointing to by letter, by word or by sentence.

Dyslexia can use "typing echo" function to practice in "Sweep-Sweep-Spell" step. Typing echo can read what you are typing by letter, by word or by sentence.

FlameReader pauses according to the punctuation marks, dyslexia can "picture" in mind of what they just read as FlameReader pause.

Obtain information by ears

You want to be informed for the latest news?

You want to obtain a great amount of information everyday?

Dyslexics are always confused by the text, they can't catch the words in order. So they can't get information by reading as easy as others, FlameReader let them receive by ears. FlameReader's powerful floating reader can speak all the text on your screen aloud. There is no trouble in reading

for dyslexics any more. Combine with RSS reader, you will be informed what is happening in the world.

Imitate, record and compare to correct pronunciation

You want to have a personal speech specialist for imitation?

You want to know whether you pronounce correctly or not?

FlameReader is your good choice! You can imitate its pronunciation anytime as you like, no need to appoint as the really ones. FlameReader is an accompanied speech specialist with standard pronunciation. After imitation, you can record with “Record” function, then listen and compare with FlameReader. In this way, again and again, dyslexics can correct their pronunciation gradually.

FlameReader is your personal speech specialist!

VISION:

Computer becomes more accessible

You blurry vision makes it hard to read the words on the screen?

You are always confused whether you’re pointing to the button you want?

You want to break away from wrong operations for poor vision?

FlameReader provide Special-Needs version for special users annoyed by visual problems. With FlameReader, you can listen to any text on the screen just select the text, and then click “Read” button.

Many impaired vision people may have experienced misery for incorrect operations, losing an important file or other significant information. FlameReader’s mouse echo function helps you avoid mistakes cause for blurry vision. It can read aloud the words, even on the buttons, which are being pointed to, by letter, by word, or by sentence. Then you can listen out whether you are pointing to the right buttons—operate correctly.

Easy to read, easy to click

Texts in reader window can be zoomed in until you see them clearly.

You’ll find it more easily to click the buttons then other programs.

You won’t face the problem that the texts are too small to be seen in FlameReader’s reader window, “Zoom In” function is specially designed for you! What’s more, Special-Needs Version supplies “Big Button” function, the buttons are big enough for you to see, and more easily to be clicked.

No trouble in typing anymore

You find it hard to type as you can’t see the words clearly?

FlameReader enables you to listen to what you are typing. “Typing echo” function can echo back the texts by letter, by word, by sentence or their combinations. For example, if you choose echo by letter and word, you enter “speak”, it reads “s, p, e, a, k, speak”. You can type correctly with FlameReader reading for you.

Proofread school assignment

You have to proofread your paper?

Your eyes are too tired to focus on the text?

Proofreading is an important work, it needs carefulness, but it also taxes eyes, even for a cautious person, some mistakes are difficult to be “seen”. With FlameReader, you can proofread your articles, papers by your ears—proofread by listening. Wrong words can be found out easily for their mispronunciations.

Study for exams by listening to your notes

You are preparing for your coming exams?

You have to remember a lot of information in a short time?

Make a learning progress by listening with FlameReader. Compared with text, voice will be more impressive. Of course, it’ll be more impressive if you memorize in both ways. So, prepare the text you want to learn, open with FlameReader, and listen to it while reading for several times, you will be excited to find it much easier. You also can save the notes into audio files to learn on your MP3 player.
